ABOUT ME

I am an Information Systems student with a strong interest in data analytics, business intelligence, and system analysis. Throughout my academic journey, I have worked on various real-world projects involving system design, API integration, ETL processing, ERP implementation, and web and mobile application development. I enjoy transforming raw data into meaningful insights, understanding business processes, and supporting decision-making through structured analysis and clear documentation. With a solid technical foundation in SQL, Python, Laravel, and BI concepts—combined with strong communication and problem-solving skills. I am committed to continuously learning and contributing to data-driven initiatives that improve operational efficiency and business performance

STRENGTHS AND EXPERTISE

Analytical Thinking	System Analysis & Design	Data Handling & SQL
Problem-Solving Ability	Web System Development	ERPNext Fundamentals
Adaptability & Continuous Learning	Understanding Business Process Understanding	Requirement Gathering & Documentation

EXPERIENCE

Circle K Indonesia Utama Customer Service Representative	Oct 2022 – May 2023
• Provided customer service by assisting customers, handling inquiries, and ensuring a positive shopping experience. • Prepared food and beverages in accordance with quality and safety standards. • Performed inventory checks, monitored stock levels, and ensured product availability. • Calculated and recorded daily sales results at the end of each shift to support accurate financial reporting. • Maintained store cleanliness and followed operational procedures consistently. • Developed strong problem-solving, communication, and multitasking skills in a fast-paced retail environment.	
Information Systems Student Association (Humanis) Program Staff	Feb 2025 – Oct 2025
Accomplishments: • Contributed to the planning and execution of academic and organizational programs, including the Study Club for Information Systems students. • Served as the Executive Chair for a community service event themed "Raising Digital Awareness: Children, AI, and the Social World" at Tunas Delima Elementary School. • Collaborated with team members to design learning activities and support student development. • Assisted in coordinating events, managing documentation, and ensuring smooth communication across committees. • Developed organizational, communication, and teamwork skills through active involvement in student initiatives.	

- Organized and coordinated event structures for major Islamic celebrations such as Muharram and Maulid.
- Served as Secretary for the Muharram and Maulid 1445 H events, responsible for documentation, agenda preparation, and communication.
- Acted as Master of Ceremony for the Muharram 1444 H event, ensuring smooth event flow and audience engagement.
- Developed strong leadership, communication, and event management skills through continuous involvement in community programs.

EDUCATION

Esa Unggul University

Bachelor of Information Systems (In Progress)

SMK AL-HUDA Kebon Jeruk

Vocational High School Diploma (Completed 2022)

ACADEMIC PROJECT EXPERIENCE

Information Systems Project Developer – University Academic Projects

1. Esggul Code Bootcamp Management System (Laravel, Filament, Livewire)

Project Link: github.com/Thifaaldz/esggulcode-2025

- Designed and developed a full-featured web-based bootcamp management system using Laravel, Filament, and Livewire.
- Built an HRM module for managing departments, branch offices, employee data, attendance tracking, and automated salary calculation.
- Developed an LMS module for structured online learning, including course management, student enrollment, and learning progress tracking.
- Integrated Midtrans payment gateway to support subscription-based transactions for bootcamp registration.
- Implemented API middleware using POST/GET methods to ensure secure and consistent communication between modules.
- Focused on system architecture, workflow design, and functional specification documentation.

2. E-SIGMA Digital Samsat System (Laravel, Filament, Livewire)

Project Link: github.com/Thifaaldz/samsatdigital-2025

- Created a digital Samsat platform to improve transparency and accessibility for public motor-vehicle administration services.
- Developed modules for:
 - SIM Registration with real-time registration status and assessment visibility.
 - E-Ticket (E-Tilang) Checking to display traffic violation history and fines.
- SIM Renewal & Application with digital submission and tracking.
- Designed system workflows, user flows, and technical documentation to support system analysis and development activities.

3. Online Agriculture Distribution & Ordering System (PHP)

Project Link: github.com/Thifaaldz/Distribusi_pertanian

- Built a web-based agriculture product distribution system using pure PHP.
- Developed features including:
 - Online Seed Ordering
 - Agriculture Consultation Services
 - Order Status Tracking
- Focused on database design, requirement analysis, and UI flow to support efficient ordering processes.

4. ERPNext Implementation, Installation, and System Integration

- Configured and utilized ERPNext CRM, Sales, and Marketing modules, including lead tracking, sales management, and marketing workflow setups.
- Conducted requirement mapping and user flow analysis related to ERP business processes.
- Installed ERPNext on Ubuntu 22.04 and deployed the system in a local server environment for academic and integration purposes.
- Performed environment troubleshooting, backend configuration, and basic performance optimization.
- Developed system integrations using Redis API (POST/GET) to connect ERPNext with external components.

6. ETL Processing for Laundry Business using Pentaho

Project Link : github.com/Thifaaldz/Laundry-ETL

- Designed and executed ETL workflows with Pentaho Data Integration.
- Extracted operational data, transformed datasets for analytics, and loaded them into structured repositories.
- Ensured data accuracy, mapping consistency, and error-handling during ETL processes.

7. Mom Care – Mobile Pregnancy Monitoring App (Flutter + Python Backend)

Project Link: github.com/Thifaaldz/MomCare-Mobile

- Developed a mobile application to monitor pregnancy progress and assist expectant mothers.
- Built core features including:
 - Weekly pregnancy monitoring based on patient check-up results.
 - Nearest midwife locator using Dijkstra's algorithm and integrated contact access.
 - Monthly check-up calendar & ultrasound schedule based on pregnancy trimester.
 - Weekly journals and personalized recommendations.
- Collaborated on backend development using Python and participated in API design and integration.
- Carried out system design, data modeling, and functional requirement documentation.

7. Research Member & Journal Publication Support

- Contributed as a research member in two academic projects, supporting the development of scientific journal publications related to:
 - GIS- and Machine Learning-based prediction modeling for hypertension service distribution.
 - Implementation of a digital academic document verification system using School Information Management System (SIM) and encryption technology.
- Assisted lecturers in data collection, preprocessing, spatial data mapping, and initial Machine Learning model testing.
- Documented training activities, system implementation, and evaluation processes at partner schools.
- Supported manuscript drafting, editing, and preparation for journal submission.
- Provided technical and field support, including system simulation, verification testing, and stakeholder coordination.

7. Research Assistant & Co-Author – Lecturer Profiling System (SINTA 4 Journal)

Journal Link : <https://www.hostjournals.com/bulletincsr/article/view/811>

- Contributed to developing a Streamlit-based academic profiling system integrating bibliometric data from Google Scholar, SINTA, and Scopus.
- Assisted in building the Streamlit interface, including data visualization components and interactive profiling features.
- Supported preprocessing and structuring of publication datasets for TF-IDF and Cosine Similarity computation.
- Contributed to writing the discussion section of the journal, including interpretation of similarity results, system performance analysis, and evaluation findings.
- Collaborated with the research team to validate system outputs, test usability, and ensure alignment with academic competency mapping objectives.

LICENSES & CERTIFICATIONS

Learn AI Basics

Mar 2025 – Mar 2028

Issued by Dicoding Indonesia

Certificate: <https://www.dicoding.com/certificates/L4PQE9ND4PO1>

Learn the Basics of Data Science

Mar 2025 – Mar 2028

Issued by Dicoding Indonesia

Certificate: <https://www.dicoding.com/certificates/07Z63MR1YZQR>

Learn the Basics of Data Visualization

Apr 2025 – Apr 2028

Issued by Dicoding Indonesia

Certificate: <https://www.dicoding.com/certificates/53XEDG16YPRN>

Learn Basic Structured Query Language (SQL)

Apr 2025 – Apr 2028

Issued by Dicoding Indonesia

Certificate: <https://www.dicoding.com/certificates/QLZ93EN22Z5D>

Getting Started with Programming with Python

Apr 2025 – Apr 2028

Issued by Dicoding Indonesia

Certificate: <https://www.dicoding.com/certificates/QLZ93EN22Z5D>
